2021 - Now

Senior UX Designer at Cisco

Research and design of various product features pertaining to Cisco's AppDynamics division.

Active projects include improving overall product navigation experience, and exposing Trace data via the OpenTelemetry specification.

2018 - 2021

UX Designer at PlanetScale

Design and development of various touchpoints encompassing the web application, and supporting artifacts (marketing website, documentation).

Highlights include a simplified dashboard to create and deploy databases online. Focus on making multi-cloud, multi-region, and database sharding easier to grasp and be consumed by developers.

2016 - 2018

Freelance

Work on multiple projects on contractual terms spanning industries including payment solutions (BillDesk), virtual networking (Juniper Networks), journalism (PARI), fintech (Wobe), and team productivity (Baloornr).

Responsibilities primarily included either redesigns of existing products with emphasis on prototyping, or augmenting the in-house team with a designer/developer skillset.

2014 - 2016

UX Designer at Arkin

(acquired by VMWare; now vRealize Network Insight)

One of two designers tasked with building out a product from scratch to complement an engineering team that grew from 8 to ~50 members before acquisition.

Primary focus on simplifying the user experience to aid in monitoring and discovery of various components that make up a datacenter. Highlights include a natural language search interface and highly-scalable visualizations (to accomodate devices in thousands).

Co-creator on patent no. US9923782B1

2009 - 2012

Engineering roles at *various*

Experience as a software engineer prior to shifting focus on design. Please visit my LinkedIn profile for details.
